Rules

1. Enter the names of the players, maximum of 4 players or 4 teams of players.

2. Roll the number of dice shown under the handicap heading in the top right of the score card.

3. Enter the total of the dice rolled for the handicap in the column next to the players names.

4. In turn roll the number of dice for each hole, either 1 or 2 depending on the par or length of the hole.

5. Enter the number rolled in the Score column

6. After all players have completed 9 holes add up the total number of shots and put in the total row.

7. Write the handicap for each player in the handicap row.

8. Deduct the handicap from the total number of shots to get your nett score.

9. The winner is the player with the lowest nett score.
